Net'n Node 5 - Installation

Net'n Node 5 is a complete new development with many improvements. The communication is now based on kDrive. Net'n Node Server is no longer required. The internal telegram handling is completely based on cEMI.

Requirement

We support 10 and Windows 11.

For Windows 10 and Windows 11 is the Visual C++ redistributable package for VS 2022 x86 needed:

https://aka.ms/vs/17/release/vc_redist.x86.exe

Installation of Net'n Node

Run the setup installer Setup_NetnNode_*.exe and follow all the instructions in the dialog boxes that appear.

The setup installer uninstall previous NetnNode 5 versions.

Installation of the license file

Copy your personal license file NetnNode5.wzlic in the NetnNode5 installation folder e.g. "C:\Program Files (x86)\Weinzierl\Net'n Node 5\".

The file name must be NetnNode5.wzlic. If the name or extension is incorrect, Net'n Node will not start.

The license file contains information about the customer, program limitations and program features.

Free Edition

You could request a license file for the Basic Version for free.

Go to our website www.weinzierl.de, register for the free edition and you'll receive a license file within 2 working days.

Professional Edition

The professional version is part of our KNX Stack Development Solutions.

You can find your license file in your stack package under Tool_NetnNode\NetnNode5.wzlic.
